

KHAKI: Hyperlocal Talent & Task Marketplace

Empowering Palawan through Digital Bayanihan, Verified Local Recruitment & Micro-Services

OWNER	Ronelyn Viana	DEVELOPER	JOSEPH BARIA
CO-OWNER	JANINE A. DOYLE	Prototype:	khaki-palawan-tasks.base44.app
Official Domain:	khakiworks.com	Primary Region:	Puerto Princesa & Palawan Province
Target Launch:	DECEMBER 2026		

1. EXECUTIVE SUMMARY

KHAKI (khakiworks.com) is a dedicated, hyperlocal multi-sided marketplace designed to bridge the gap between skilled individuals, local households, and commercial enterprises in Palawan. Positioned as *"The Digital Bayanihan Platform,"* KHAKI combines micro-task service fulfillment (on-demand home repair, cleaning, tutoring, pet care) with structured talent recruitment for local businesses.

By focusing exclusively on Palawan—starting in Puerto Princesa City—KHAKI solves the fragmentation, security risks, and informalities of existing solutions (such as unverified Facebook groups). The platform operates on a safe escrow model via **Khaki Wallet**, integrated with GCash and Maya, ensuring service providers receive fair compensation while clients pay only upon verified job completion.

Strategic Core Imperative: Palawan is experiencing massive economic expansion. KHAKI ensures that local residents ("Palawenyos") are first-in-line beneficiaries of this growth by digitizing trust, credentialing, and job distribution.

2. BRAND ARCHITECTURE & STRATEGIC VISION

Mission Statement

To build and empower the workforce of Palawan by providing a secure, accessible platform that prioritizes local talent, strengthens small businesses, and catalyzes sustainable provincial economic growth.

Vision Statement

To establish KHAKI as the premier digital Bayanihan ecosystem across the Philippine archipelagic frontiers, creating transparent and dignified earning opportunities for every Palaweno household.

The Three Brand Pillars:

- SAFE** Identity verification (Barangay ID/Government ID), in-app secure chat, and escrow payment protection through Khaki Wallet.
- AFFORDABLE** Low baseline transaction thresholds (**₱100 to ₱5,000**) making professional services accessible to everyday households.
- LOCAL** Hyperlocal radius matching prioritizing neighborhood proximity, local economic empowerment, and community trust.

3. PRODUCT & TECHNICAL SPECIFICATIONS (DEVELOPER BLUEPRINT)

This section serves as the functional design document for engineering execution. The developer must build a responsive web application and native-feeling mobile interface with four distinct user roles.

3.1 Role Architecture & Core Functional Modules

User Role	Core Capabilities	Key Technical Requirements
1. Client / Consumer	Post micro-tasks, review bids, select Taskers, deposit funds into Khaki Wallet, rate completed tasks.	Geofenced posting, multi-photo uploader, escrow hold trigger, task status dashboard.
2. Tasker (Service Provider)	Browse localized feed, submit custom offers/bids, submit completion proof, request payout.	ID Verification portal, badge assignment, wallet balance viewer, rating history.
3. Business Enterprise	Post long-term/full-time job vacancies, filter qualified local applicants, access premium listings.	Company profile verification, applicant tracking board, monthly billing subscription.
4. System Admin	Platform oversight, dispute resolution, commission tracking, KYC approval, payout clearance.	Financial reporting ledger, automated commission split logic, dispute arbitration tools.

3.2 Feature Matrix & UI Requirements

- **Mandatory UI Controls (from Prototype):** Maintain prominent calls-to-action Mag-post ng Gawain (Post a Task) and Mag-login (Login) across all primary header navigation.
- **Task Posting Engine:** Input fields for Title, Category dropdown (*Salon & Wellness, Pet Care, Home Cleaning, Academic Tutoring, AC/Appliance Repair, Express Delivery*), Detailed Description, Budget Range (**₱100 – ₱5,000**), Location (Barangay selector for Puerto Princesa), Media attachments, and Due Date/Time.
- **Localized Task Feed:** Real-time filtering by Barangay proximity, price band, and category.
- **Khaki Wallet System (Escrow):** Mandatory payment holding architecture powered by GCash / Maya API integrations. Payment MUST NOT be directly transferred off-platform initially.

CRITICAL FAQ & SYSTEM FLOW CORRECTION

Legacy Incorrect Copy: "Payment is between you and the tasker. KHAKI does not handle payments."

Mandatory Updated Logic: "All payments are processed securely via Khaki Wallet (powered by GCash/Maya). KHAKI holds funds safely in escrow upon task acceptance and releases them to the Tasker upon client completion sign-off."

3.3 Database & Admin Financial Logging Schema

To comply with audit standards and automated revenue accounting, the developer must implement the following administrative ledger table structure:

Transaction ID	Task Amount	KHAKI Commission (10%)	Tasker Net Payout (90%)	Payment Gateway Ref	Timestamp
TXN-2026-8801	₱1,000.00	₱100.00	₱900.00	GCASH-99201823	2026-09-10 14:22
TXN-2026-8802	₱500.00	₱50.00	₱450.00	MAYA-44102931	2026-09-10 15:05

4. MARKET ANALYSIS & GO-TO-MARKET STRATEGY

Target Demographic: Puerto Princesa City (Population ~300,000). Research indicates over 60% of service searches currently occur via disorganized Facebook groups with zero consumer protection. Primary personas include busy working parents, young professionals, and boutique resort owners in PUERTO PRINCESA El Nido/Coron seeking trustworthy local assistance.

4.1 Phased User Acquisition Blueprint (Goal: 1,000 Active Users)

Phase	Target Strategy & Operational Focus	Key Performance Indicator (KPI)
Months 1–2: Hyperlocal Seed	• Launch in key Barangays: <i>San Jose, Tiniguiban, Sicsican</i>. • Onboard 30 seed Taskers manually with complimentary professional photoshoots + Verified Badges. • Meta Ads targeting 22–45 yo (₱100/day budget). • Barangay Hall physical poster placement. • Launch Promo: Zero commission on first 50 tasks.	• 30 Verified Taskers onboarded. • 50 Successful completed tasks. • Initial community trust established.
Months 3–4: Trust & Virality	• Launch "Palaweño Success" video testimonials. • Enforce 100% rating/review cycle. • Referral Program: ₱50 wallet credit for referrer & referee upon first completed task.	• 300 Active registered users. • 200 Monthly completed tasks. • 4.5+ Avg Platform Rating.
Months 5–12: B2B Expansion	• Launch B2B recruitment portal for full-time jobs. • Regional expansion into El Nido and Coron hubs. • Local SEO optimization ("Puerto Princesa home repair", "Palawan job listings").	• 1,000+ Active Users. • 500 Monthly task volume. • 15 Corporate subscriptions.

5. BUSINESS MODEL & FINANCIAL PLAN

5.1 Revenue Streams

1. **Transaction Commission (Core Engine):** 10% platform fee per completed task charged to the client transaction total. (*Revenue = Task Amount × 0.10*).
2. **Featured Task Listings:** **₱49** flat fee paid by client to pin a task listing to the top of the feed for 72 hours.
3. **Business Subscription:** **₱499/month** for local businesses requesting unlimited full-time job postings and applicant resume access.

5.2 Initial Capital Requirements & Operational Expenses

Expense Category	Cost Type	Budget Allocation (PHP)
Full-Stack Developer Setup (One-time)	Capital Expenditure	₱40,000.00 – ₱60,000.00
Domain Registration (khakiworks.com)	Annual Fixed	₱800.00 / year
Cloud Infrastructure & Hosting	Annual Fixed	₱5,000.00 / year
Marketing & Community Onboarding	Variable First Year	₱30,000.00 / year
Estimated Monthly Overhead	Monthly Fixed Run-Rate	~ ₱8,000.00 / month

5.3 12-Month Financial Projections & Revenue Runway

Financial forecasts based on baseline transaction commission model (Average Task Price = **P**):

Timeframe	Monthly Task Volume	Avg. Order Value (₱)	Gross Merchandise Value (GMV)	Gross Revenue (15%)
Months 1 – 3	50 tasks / mo	<i>₱600.00</i>	<i>₱30,000.00</i>	<i>₱4,500.00 / mo</i>
Months 4 – 6	200 tasks / mo	<i>₱650.00</i>	<i>₱130,000.00</i>	<i>₱19,500.00 / mo</i>
Months 7 – 12	500 tasks / mo	<i>₱700.00</i>	<i>₱350,000.00</i>	<i>₱52,500.00 / mo</i>

Break-Even Benchmark: The platform reaches operational break-even at approximately **100 completed tasks per month** (yielding ~**₱9,750** gross commission, fully covering **₱8,000** monthly operational run-rate).

6. LEGAL, TAXATION & RISK COMPLIANCE

- **Business Registration:** Operations run under DTI Certificate **TO BE POSTED**.
- **Independent Contractor Status:** Terms of Service must explicitly state that KHAKI acts purely as a technology broker/marketplace and not as a direct employer. Taskers maintain independent contractor status.
- **Taxation (BIR):** Taxable income is strictly limited to the 15% commission revenue (and non-commission platform fees), NOT total GMV. Tax compliance requires quarterly filing of 3% Percentage Tax (BIR Form 2551Q) on gross platform commission income.
- **Data Privacy:** Full compliance with the Philippine Data Privacy Act of 2012 (R.A. 10173) for user identification storage and wallet transaction encryption.
